Universal Human Values – II (UHV-II)

A Foundation Course in Human Values and Professional Ethics

Module 1 – Introduction to Value Education | Student Activity Worksheet

Session	3	**Lecture**	Lecture 3 (Unit 3)
Topic	Unit 3 · Session 3 — To enable students to understand the human being comprehensively as the first step		
Name	URVASHI PANDEY	**Reg. No.**	RA2511003010697
Branch / Sec.	C.Tech	**Date**	2026-10-02

Session Learning Outcomes

By the end of this session, the student should be able to:

- To enable students to understand the human being comprehensively as the first step
- To enable students to understand the core theme of the course, thereby laying the foundation for self-exploration and holistic living.
- Students will be able to analyze and understand the human being in a comprehensive manner, recognizing the self as the core entity

How to Engage with this Session (The Process)

- Whatever is said is a proposal — do not assume it to be true or false.
- Verify it on your own right, on the basis of your natural acceptance.
- It is a dialogue: first between you and the teacher, then within your own self — between what you are and what you really want to be.

Part A — Key Ideas (Recap)

- How does self-exploration lead to harmony with others?: Self-exploration clarifies human aspirations (like happiness and prosperity), leading to mutual trust, respect, and just relationships with family and society.
- Why is the study of the human being critical for engineering students?: Because engineers design solutions for society, and understanding human values ensures that technology serves humanity ethically and sustainably.

Part B — In-Class Activity

Activity 1: Self-Exploration and Natural Acceptance for Session 3

Analyze the core proposal on the basis of natural acceptance and self-verification.

Core Proposal Aspect	Naturally Acceptable? (Yes/No)	Current Practice (Living with it?)
To enable students to understand the human be...	Yes (Naturally Acceptable)	In Progress / Conscious Effort
To enable students to understand the core the...	Yes (Naturally Acceptable)	Self-Observing Regularly

Personal Observation: When verifying To enable students to understand the human being comprehensi through my natural acceptance, it leads to internal harmony, clarity of purpose, and unconditional fulfillment.

Living in alignment with this understanding eliminates internal contradictions and fosters mutual happiness in all dimensions of life.

Activity 2: Participation in the Order of Society and Nature

Identify concrete steps to translate understanding into conduct and relationship.

Dimension of Living	Commitment & Action Plan
Thought & Imagination	Ensure desires are guided by natural acceptance rather than pre-conditioning.
Behavior & Relationship	Express feelings of trust, respect, and affection unconditionally in daily interactions.
Work & Production	Engage in mutually enriching work with nature, ensuring conservation and sustainability.

Part C — Long-Answer Questions

Q1. Explain respect as right evaluation.

Respect means right evaluation of a human being. Right evaluation must be based on the Self, not only on the body, wealth, post, marks, caste, gender or physical appearance. Respect includes right evaluation of intention and competence. Wrong evaluation may be of three types: over-evaluation, under-evaluation and otherwise-evaluation. All these are forms of disrespect because they do not evaluate the person as they really are. The minimum content of respect is to understand that the other is similar to me. Both I and the other want continuous happiness and prosperity; both of us have the same basic program of understanding and living in harmony; and both of us have the potential for right understanding. Therefore, respect means seeing the other as a human being like me, while also recognising differences in competence without disrespecting the person.

Q2. How does self-exploration lead to harmony with others?

Self-exploration clarifies human aspirations (like happiness and prosperity), leading to mutual trust, respect, and just relationships with family and society.

Q3. Why is the study of the human being critical for engineering students?

Because engineers design solutions for society, and understanding human values ensures that technology serves humanity ethically and sustainably.
