Universal Human Values – II (UHV-II)

A Foundation Course in Human Values and Professional Ethics

Module 1 – Introduction to Value Education | Student Activity Worksheet

Session	5	**Lecture**	Lecture 5 (Unit 3)
Topic	Unit 3 · Session 5 — Students will be able to understand and explain the human being as a co-existence of the Self (consciousness) and the Body (material entity)		
Name	URVASHI PANDEY	**Reg. No.**	RA2511003010697
Branch / Sec.	C.Tech	**Date**	2026-10-02

Session Learning Outcomes

By the end of this session, the student should be able to:

- Students will be able to understand and explain the human being as a co-existence of the Self (consciousness) and the Body (material entity)
- recognize their distinct roles in ensuring holistic human existence.
- Students learn to distinguish between the needs, activities, and characteristics of the Self (conscious entity) and the Body (material entity)

How to Engage with this Session (The Process)

- Whatever is said is a proposal — do not assume it to be true or false.
- Verify it on your own right, on the basis of your natural acceptance.
- It is a dialogue: first between you and the teacher, then within your own self — between what you are and what you really want to be.

Part A — Key Ideas (Recap)

- Why is understanding the co-existence of self and body important for engineering students?: Understanding this helps engineering students appreciate human-centered design, ergonomics, AI-human interactions, and ethical considerations in technology, as it emphasizes both physical and conscious aspects of humans.
- Give an example of how the self and body work together in daily life.: While driving a car, the body performs physical actions like steering and braking, while the self makes decisions, observes surroundings, and plans routes. Both must function together for safe driving.

Part B — In-Class Activity

Activity 1: Self-Exploration and Natural Acceptance for Session 5

Analyze the core proposal on the basis of natural acceptance and self-verification.

Core Proposal Aspect	Naturally Acceptable? (Yes/No)	Current Practice (Living with it?)
Students will be able to understand and expla...	Yes (Naturally Acceptable)	In Progress / Conscious Effort
recognize their distinct roles in ensuring ho...	Yes (Naturally Acceptable)	Self-Observing Regularly

Personal Observation: When verifying Students will be able to understand and explain the human be through my natural acceptance, it leads to internal harmony, clarity of purpose, and unconditional fulfillment.

Living in alignment with this understanding eliminates internal contradictions and fosters mutual happiness in all dimensions of life.

Activity 2: Participation in the Order of Society and Nature

Identify concrete steps to translate understanding into conduct and relationship.

Dimension of Living	Commitment & Action Plan
Thought & Imagination	Ensure desires are guided by natural acceptance rather than pre-conditioning.
Behavior & Relationship	Express feelings of trust, respect, and affection unconditionally in daily interactions.
Work & Production	Engage in mutually enriching work with nature, ensuring conservation and sustainability.

Part C — Long-Answer Questions

Q1. Explain the meaning of harmony in society.

Society is the next larger order after family. It is made up of many families living together and making collective effort for a common goal. Harmony in society means that human beings live together in a way that fulfils the human goal. The human goal includes right understanding and right feeling in every individual, prosperity in every family, fearlessness or trust in society, and co-existence with nature. For this, society requires proper systems such as education-sanskar, health-sanyam, production-work, justice-suraksha and exchange-storage. When these systems are guided by right understanding, they support mutual happiness and mutual prosperity. Thus, a harmonious society is not just a crowd of people; it is a family-based society where individuals and families participate responsibly for the fulfilment of the human goal.

Q2. Why is understanding the co-existence of self and body important for engineering students?

Understanding this helps engineering students appreciate human-centered design, ergonomics, AI-human interactions, and ethical considerations in technology, as it emphasizes both physical and conscious aspects of humans.

Q3. Give an example of how the self and body work together in daily life.

While driving a car, the body performs physical actions like steering and braking, while the self makes decisions, observes surroundings, and plans routes. Both must function together for safe driving.
