Universal Human Values – II (UHV-II)

A Foundation Course in Human Values and Professional Ethics

Module 1 – Introduction to Value Education | Student Activity Worksheet

Session	1	**Lecture**	Lecture 1 (Unit 4)
Topic	Unit 4 · Session 1 — Students will be able to explain the comprehensive understanding of existence by including the role and place of Nature,		
Name	URVASHI PANDEY	**Reg. No.**	RA2511003010697
Branch / Sec.	C.Tech	**Date**	2026-10-02

Session Learning Outcomes

By the end of this session, the student should be able to:

- Students will be able to explain the comprehensive understanding of existence by including the role and place of Nature,
- demonstrate how this knowledge helps in appreciating interconnectedness, harmony, and sustainable living.
- Students will gain clarity on the comprehensive knowledge of existence by including Nature, recognize the interrelationship between human beings and the natural world

How to Engage with this Session (The Process)

- Whatever is said is a proposal — do not assume it to be true or false.
- Verify it on your own right, on the basis of your natural acceptance.
- It is a dialogue: first between you and the teacher, then within your own self — between what you are and what you really want to be.

Part A — Key Ideas (Recap)

- What is meant by comprehensive understanding of existence?: It means realizing that existence is a continuous, interconnected whole where every entity (living and non-living) coexists in harmony.
- How is ‘nature’ included in the understanding of existence?: Nature is a part of existence, consisting of material, plants, animals, and humans. Understanding existence includes recognizing how all these entities are interrelated.

Part B — In-Class Activity

Activity 1: Self-Exploration and Natural Acceptance for Session 1

Analyze the core proposal on the basis of natural acceptance and self-verification.

Core Proposal Aspect	Naturally Acceptable? (Yes/No)	Current Practice (Living with it?)
Students will be able to explain the comprehe...	Yes (Naturally Acceptable)	In Progress / Conscious Effort
demonstrate how this knowledge helps in appre...	Yes (Naturally Acceptable)	Self-Observing Regularly

Personal Observation: When verifying Students will be able to explain the comprehensive understan through my natural acceptance, it leads to internal harmony, clarity of purpose, and unconditional fulfillment.

Living in alignment with this understanding eliminates internal contradictions and fosters mutual happiness in all dimensions of life.

Activity 2: Participation in the Order of Society and Nature

Identify concrete steps to translate understanding into conduct and relationship.

Dimension of Living	Commitment & Action Plan
Thought & Imagination	Ensure desires are guided by natural acceptance rather than pre-conditioning.
Behavior & Relationship	Express feelings of trust, respect, and affection unconditionally in daily interactions.
Work & Production	Engage in mutually enriching work with nature, ensuring conservation and sustainability.

Part C — Long-Answer Questions

Q1. Explain harmony in nature through the four orders.

Nature is understood as a collection of units organised in four orders: physical order, bio/pranic order, animal order and human order. The physical order includes soil, metal, water and air. The bio order includes plants and trees. The animal order includes animals and birds. The human order includes human beings. Each order has its own activity, innateness and inheritance. The first three orders are already in definite conduct and are mutually fulfilling for one another. For example, plants depend on soil, water and air, while they also enrich the environment. Animals depend on plants and the physical order, and they also participate in nature's cycles. The human being has the capacity to understand this harmony and live accordingly. Therefore, harmony in nature means recognising the interconnectedness and mutual fulfilment among all four orders, and ensuring that human participation does not disturb this order

Q2. What is meant by comprehensive understanding of existence?

It means realizing that existence is a continuous, interconnected whole where every entity (living and non-living) coexists in harmony.

Q3. How is 'nature' included in the understanding of existence?

Nature is a part of existence, consisting of material, plants, animals, and humans. Understanding existence includes recognizing how all these entities are interrelated.
