Part C — Long-Answer Questions

Q1. What is the main learning from Practice Session 10 related to nature and present-day problems?

Practice Session 10 helps us understand that many present-day problems are connected with the lack of right understanding in human conduct. Environmental breakdown, climate change, water insecurity, food insecurity, excessive consumption and resource depletion are not merely technical problems. They are also connected with greed, accumulation, profit obsession and wrong assumptions about development. The session shows that human beings have often disturbed the balance in nature by overusing resources and ignoring mutual fulfilment. The main learning is that the solution must begin with right understanding. Human beings must move from exploitation of nature to preservation, protection, enrichment and right utilisation of nature.

Q2. What does realization in the self mean?

Realization means becoming aware of the reality of existence, especially the co-existence of all entities (living and non-living).

Q3. What are the three key awakening activities of the self?

The three activities are Realization, Understanding, and Contemplation.
