Universal Human Values – II (UHV-II)

A Foundation Course in Human Values and Professional Ethics

Module 1 – Introduction to Value Education | Student Activity Worksheet

Session	5	**Lecture**	Lecture 5 (Unit 5)
Topic	Unit 5 · Session 5 — Students will be able to explain the different aspects of All-encompassing Resolution, including understanding, wisdom, and science		
Name	URVASHI PANDEY	**Reg. No.**	RA2511003010697
Branch / Sec.	C.Tech	**Date**	2026-10-02

Session Learning Outcomes

By the end of this session, the student should be able to:

- Students will be able to explain the different aspects of All-encompassing Resolution, including understanding, wisdom, and science
- analyze how these aspects contribute to holistic human development and harmonious living.
- Students will develop the ability to critically reflect on the different aspects of All-encompassing Resolution—understanding, wisdom, and science

How to Engage with this Session (The Process)

- Whatever is said is a proposal — do not assume it to be true or false.
- Verify it on your own right, on the basis of your natural acceptance.
- It is a dialogue: first between you and the teacher, then within your own self — between what you are and what you really want to be.

Part A — Key Ideas (Recap)

- Why is it important to integrate science with human values?: Without values, science can lead to misuse and harm (e.g., weapons, pollution), but with values, it supports human welfare and ecological balance.
- What is the ultimate outcome of the all-encompassing resolution?: The outcome is a harmonious coexistence of self, society, and nature, where technology, wisdom, and human values work together for holistic well-being.

Part B — In-Class Activity

Activity 1: Self-Exploration and Natural Acceptance for Session 5

Analyze the core proposal on the basis of natural acceptance and self-verification.

Core Proposal Aspect	Naturally Acceptable? (Yes/No)	Current Practice (Living with it?)
Students will be able to explain the differen...	Yes (Naturally Acceptable)	In Progress / Conscious Effort
analyze how these aspects contribute to holis...	Yes (Naturally Acceptable)	Self-Observing Regularly

Personal Observation: When verifying Students will be able to explain the different aspects of Al through my natural acceptance, it leads to internal harmony, clarity of purpose, and unconditional fulfillment.

Living in alignment with this understanding eliminates internal contradictions and fosters mutual happiness in all dimensions of life.

Activity 2: Participation in the Order of Society and Nature

Identify concrete steps to translate understanding into conduct and relationship.

Dimension of Living	Commitment & Action Plan
Thought & Imagination	Ensure desires are guided by natural acceptance rather than pre-conditioning.
Behavior & Relationship	Express feelings of trust, respect, and affection unconditionally in daily interactions.
Work & Production	Engage in mutually enriching work with nature, ensuring conservation and sustainability.

Part C — Long-Answer Questions

Q1. What are holistic technologies, production systems and management models?

Holistic technologies, production systems and management models are those that are guided by right understanding and support sustainable human welfare. A holistic technology should fulfil real human needs, be compatible with natural systems, be safe, low-cost, energy-efficient, locally producible, durable and recyclable. A holistic production system should answer what to produce, how to produce, for whom to produce and how much to produce in the light of human need and local resources. It should support local consumption, meaningful employment, decentralisation and eco-friendly production. A holistic management model should be relationship-based, cooperative, just and mutually fulfilling, rather than profit-centred and exploitative. Such systems support human development, prosperity and preservation of nature.

Q2. Why is it important to integrate science with human values?

Without values, science can lead to misuse and harm (e.g., weapons, pollution), but with values, it supports human welfare and ecological balance.

Q3. What is the ultimate outcome of the all-encompassing resolution?

The outcome is a harmonious coexistence of self, society, and nature, where technology, wisdom, and human values work together for holistic well-being.
